

## Injectable materials in bulk

### Aesthetic, light-weight and resistant dentures

BULKFLEX is Deflex's new line of injectable materials in bulk.

High quality thermoplastic polymers in bulk packaging allows for dispensing only the amount necessary for each denture.

- Resistant materials
- Metal-free
- Minimal shrinkage
- High color stability
- Easy injection

### TENAZ Semi-flexible polyamide

- Highly resistant to breaking or deformation
- Very fluid, easy injection
- Translucency: medium

**Recommended for flexible partials**

### VERSATIL Semi-rigid polyamide

- Total versatility: excellent balance of elasticity and strength
- Allows for all types of design. Occlusal rests can be made
- High translucency. Easy to polish

**Ideal for all types of partials**

### ACRYNEL Injectable acrylic

- Extra strength translucent acrylic
- Minimal shrinkage
- Adheres to normal acrylic (possibility of relining and additions using conventional materials and techniques)

**Light and resistant full dentures**

### ACETAL Injectable Acetal

**Partial denture frameworks and tooth-colored retainers**

#### Uses:

- Partial dentures
- Full dentures
- Combined with chromium
- Overdentures
- Occlusal splints
- Partial denture frameworks
- Tooth-colored retainers
